

The SWING GLOVE™ SIZING CHART

Everyone's hands are different and what feels like a comfortable fit can vary from person to person. Since palm size relative to finger length is not consistent from person to person Swing Glove suggest using the diagram below to determine an approximate glove size. You can also look at the size of your

current glove and the Swing Glove should be the same. Please make sure you print out the chart at 100% without printer scaling. Don't worry if you are inbetween sizes. The Swing Glove's Cabretta leather helps it adjust to a perfect fit.

Glove Measurements:

- 1) Line up your index finger at line one
- 2) Line up your first knuckle at 2
- 3) Line up your knuckles across knuckle line
- 4) Read across knuckle line to get measurement
